

OVERVIEW

3manager is a financial resource planning system, developed to manage the printing and copying operation, completely independently of manufacturer brands. Accurate information about your printing and copying operation is important at any time. Getting the right information at the right time, has never been more critical when making decisions about procurements, cutting costs and how to optimise your fleet.

Could you save costs by purchasing new equipment? 3manager analyses the current fleet, your current contract details and other data to ensure you make accurate informed decisions.

Do you know how your printing and copying operation impacts on the environment? 3manager works out your kWh consumption and CO2 emissions accurately, identifying which devices are the most polluting, which devices are left on and not used, which department is the greenest. The graphical overview of environmental performance gives you an 'at a glance' view of whether or not you are moving in the right direction and becoming greener and more focussed on the environment.

Datasheet

3manager

Intelligent planning tool for printers and copiers

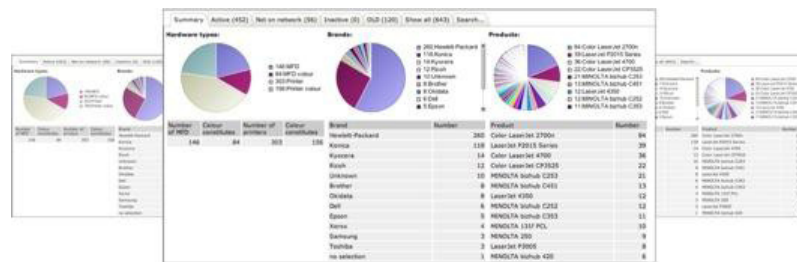

KEY BENEFITS

- ✓ Understand your exact costs, potential savings and true buying requirements
- ✓ Save time managing your contracts
- ✓ Streamline your operation using ongoing analysis
- ✓ Respond to negative usage trends
- ✓ Plan budgets based on concrete evidence/information
- ✓ Cut costs and save time
- ✓ Manufacturer independent
- ✓ Know your carbon footprint quickly and accurately
- ✓ Save time on meter readings

KEY FEATURES

- ✓ Easy to use dashboard – graphical overview of device activity
- ✓ Contracts and equipment - track your financial obligations and how they impact equipment purchases
- ✓ Usage and expenses – follow usage and expenses in real-time
- ✓ Economise & optimise – know potential savings in advance
- ✓ Power consumption & CO2 – understand how your printing and photocopying impact the environment
- ✓ Reporting – up-to-date automatic reports
- ✓ Proactive alarm – set alerts for notification based on certain criteria
- ✓ Meter reading reports – send PDF or CSV report directly to your service vendor automatically

- Complete enterprise view of your printers and photocopiers
- Measure capacity, utilisation, costs, power consumption and CO2 emissions
- Alert on contract breaches and device errors (toner/paper out/low)
- Optimise, rationalise and relocate devices to match your organisation’s needs
- Match purchase decisions to exact organisational requirements

TECHNICAL SPECIFICATIONS

Agent:

Win XP Pro or later: Windows Server 2003 SP2 or later: Windows 2008 64-bit (requires support for 32 bit applications are enabled)

Firewall:

The agents are using the following ports:

80 Web (standard open): 161 + 162 SNMP (Standard open): 515 LPR (Standard open); In 95% of all cases all necessary ports are open as standard

3manager web:

Internet Explorer 6 or later: Firefox (Mac + Win): Safari (Mac + Win): Java

Security:

Only information from the public MIB (managed information base) will be sent: Counters: Toner status: Device status: Serial number: Mac-Address. No information regarding users or document information will be sent or processed in 3manager services.

EVALUATION PROCESS

Free 30 day evaluation on request. For more information please contact our solutions team on 0113 273 0300 or email solutions@altman.co.uk.
