

OVERVIEW

The solution provides the ability for users to connect and use printing services from their own laptops, PCs or mobiles without any drivers or software needing to be installed, and without having to authenticate to the organisation's network.

This removes the costs, security concerns and support overhead associated with configuration of users' own laptops or mobile devices for printing, providing easy access to printers. Suitable for use in any size corporate organisation or educational environments such as open access areas, libraries and halls of residence – for students, staff and "guest" users. The solution can also be used to enable other non-authenticated users to print in places such as hotels, leisure and public places where network access is available but not typically with printing services directly offered.

KEY FEATURES

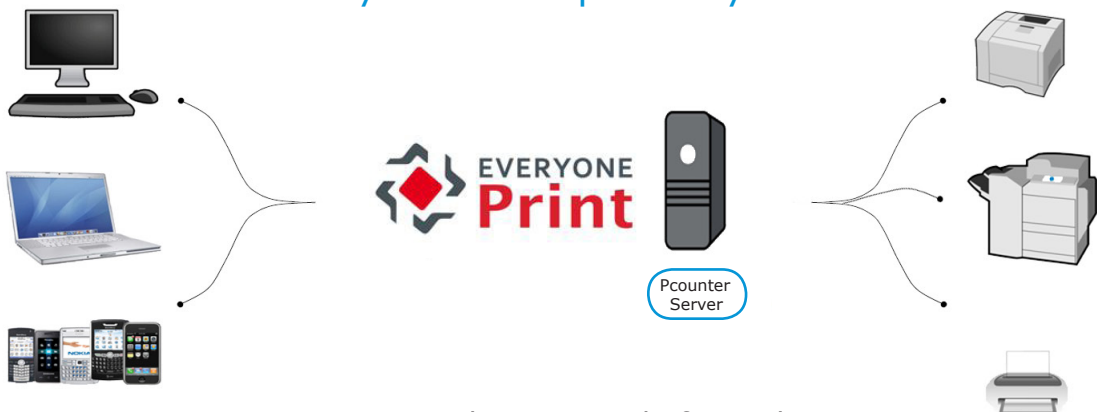

- ✓ Web Print – upload documents via browser from anywhere with an internet connection
- ✓ Email Print - print via email (body and/or attachments)
- ✓ Driver Print – print normally from all applications using a print driver
- ✓ Support for any client platform including Windows, MAC, Linux, Mobile/PDA etc
- ✓ Supports all printers
- ✓ Secure printing & pull printing supported
- ✓ Integration with Pcounter for accounting/charging of all users including guests

Datasheet

EveryonePrint

Mobile Printing for Staff, Students & Guests

Easy access to print anywhere

Secure authentication before release

THREE WAYS TO PRINT

Web Print

Upload documents using a web browser in popular formats such as Microsoft Office, OpenOffice or PDFs. No drivers or software to install.

Email Print

Send emails and documents to print as attachments via email, from anywhere, including from mobile devices.

Driver Print

One quick and easy self-service setup procedure and users can print directly in the usual way from any application on their own computers, Windows, Mac and Linux, to all available printers.

SECURE RELEASE METHODS SUPPORTED

- External terminal
- Embedded software
- Pcounter Station or web browser release
- Embedded browser based release terminal available for Canon, Konica Minolta, Toshiba and Xerox

COST RECOVERY

Users can pay for their prints from their existing Pcounter account, payment card or with their credit/debit card. E-payment capability is perfect for hotels, airports, campus, libraries, wi-fi hotspots, cafés and other similar public places.

KEY BENEFITS

- ✓ Any device anywhere - enables users to use their own laptops/mobiles
- ✓ Increased security- users do not need to authenticate to the network (web connection only)
- ✓ Reduces support overhead for clients/printers
- ✓ Ensures all output is accounted/charged for (with Pcounter integration)
- ✓ Increased convenience and productivity - enables more flexible, efficient working

TECHNICAL SPECIFICATIONS

- Supported servers include: Windows 2003 Server SP2 (32 or 64 bit), Windows 2008 Server SP1 (32 or 64 bit) or Windows 2008 R2 Server (32 or 64 bit).
- Recent generation server CPU processor, such as Intel Xeon 64 or equivalent (see below for important note about performance). Desktop CPU's NOT recommended for production use.
- Minimum 1 GB free RAM memory (minimum 4 GB free RAM memory recommended for higher volume processing).
- Minimum 5 GB free hard disk space for print job spooling and processing (10 GB free disk space recommended for higher volume processing).

EVALUATION PROCESS

Installs in minutes, with very simple web configuration and management.

To request a free 60 day evaluation or for more information please contact our solutions team on 0113 273 0300 or email solutions@altman.co.uk.
