

OVERVIEW

Pcounter TouchPad terminals work with Pcounter, an intelligent, flexible, control and monitoring solution designed to manage combined print and photocopy activity. Pcounter is ideal for any organisation wanting to capture information on a pay for service basis - via a charge back mechanism - or for print auditing purposes.

Printers and photocopiers are managed with the Pcounter TouchPad terminal, which acts as a secure print release station. The Pcounter TouchPad terminal supports user authentication by ID number, Network login entry, Magnetic Stripe, MIFARE™ and other card technologies, or biometrics. All general administration of the Pcounter TouchPad solution is kept low with an array of automated functions available to keep processes simple.

Additional transaction details for charge backs is possible for nominated users, which includes cost centres, budget or client codes.

A built in 2-port Ethernet Hub allows any host network device to connect directly to the Pcounter TouchPad terminal, eradicating the need for two hard wired network ports. This new feature eliminates further disruption to your wiring infrastructure - saving you time and money.

Datasheet

Pcounter TouchPad Terminal

Advanced Print and Copy Control

KEY FEATURES

- ✓ Real-time copier control and accounting
- ✓ Keypad, ID card or biometric authentication
- ✓ Secure print release with pull-printing options
- ✓ Configurable display and input prompts
- ✓ Pass through mini-hub – no extra network point required
- ✓ DDI compliant
- ✓ Manufacturer independent
- ✓ Touch screen technology

TECHNICAL SPECIFICATIONS

Connectivity

- The Pcounter TouchPad can be connected to any make or model of photocopier, printer or MFD currently on the market
- Secure print release and pull printing functionality
- Advanced interfacing features are available for some Multifunctional Devices

Pcounter TouchPad Specification

- Dimensions: 170mm W x 130mm L x 60mm D
- Interface: 6 opto-isolated inputs 5-24 volts, 2 output relay contact pair, RS232 and USB
- Display: 7 inch touch screen, Resolution 18 Bit Colour
- Power: 12v DC 1amp
- Memory: 256 MByte Flash, 6MByte RAM
- Reader: ISO 2894 read only, 3 track magnetic stripe, MIFARE™ Radio receiver
- IP Comms: Ethernet 10/100 base-T, with dual port hub 128 bit Encrypted TCP/IP protocol
- Installation: Various mounting bracket options

KEY BENEFITS

- Centralised, integrated accounting and reporting
- Single network purse for all copy and print transactions
- Flexible, configurable authentication for secure access
- Vendor independent – all major copier models supported
- ID card independent – most card technologies are supported
- Biometric authentication available

Card Specification

- The Pcounter TouchPad is compatible with the following card technology: MIFARE™, Proximity, Magnetic Stripe ISO Standard, HID, iclass and other card technologies - please contact us for further information
- Additionally ID login and network login entry for extra security - we can provide card design as a bureau service or you might wish to invest in a card printing system
- If you have a smart card solution in use on your site, please provide specifications and we shall then advise the card's compatibility with this terminal

EVALUATION PROCESS

- Live demonstration or webinar overviews can be arranged.
- Units can be provided on a sale or return basis subject to Altman Technologies terms.
- For more information please contact our solutions team:
