

OVERVIEW

Pcounter Web Report (PWR) is an additional chargeable Pcounter reporting option, providing enhanced, browser-based, detailed graphical reports. Pcounter's standard logged data is imported to the PWR SQL database for detailed drill down analysis and reporting via a client PC browser-based application, enabling non-IT staff to run reports. PWR offers an enhanced device monitor that alerts administrators of over/under utilised devices.

Pcounter Web Report works seamlessly alongside the core Pcounter software and uses the raw Pcounter logs in its own SQL database providing detailed, sophisticated analysis via a browser interface. End users can be given access to their own reports - including print history analysis - ideal for self-service in student environments.

Reports can also be scheduled to be generated automatically and emailed to designated recipients.

Datasheet

Pcounter Web Report

Browser-based graphical reporting for Pcounter

KEY FEATURES

- ✓ Detailed graphical analysis of Pcounter logged transactions via browser interface
- ✓ Reporting of print and copy transactions, with mono and colour breakdown
- ✓ Analysis by user, printer, cost-centre, client and costs
- ✓ Variety of filter and output options
- ✓ Automatic scheduling of routine reports
- ✓ Dashboard for quick insights into usage
- ✓ End user portal - PWR users can log on and view their print job history
- ✓ Global reports - condensed information
- ✓ Detailed reports - full detailed analysis of basic data, cost of jobs etc.
- ✓ Device monitor alerts
- ✓ Scan and fax reporting
- ✓ Environmental reports available
- ✓ Easy to use help desk interface

KEY BENEFITS

- ✓ Enhanced management information – enterprise-wide centralised reporting
- ✓ Enables self-service report generation for non IT staff
- ✓ Browser-based – low cost, easy to implement and manage
- ✓ Enhanced management of devices
- ✓ True visibility of overall print/copy output costs
- ✓ Environmental impact can be analysed
